

Optimizing your balancing process

Digital, sustainable, innovative, efficient

Invitation

Welcome to the world's leading trade fair for production technology Hannover September 18th to 23rd, 2023 Hall 6, Booth B 51

Passion for Balancing

Experience metal processing technology across its full range: from cutting and forming, machining to manufacturing, automation and production line facilities, to industrial electronics. Complemented by a fascinating supporting program with special exhibitions, forums, and conferences that provide you with information and guidance on current trend topics. All under the motto „Innovative Manufacturing.“ And we're part of it!

As a global solutions provider in the field of balancing technology, Schenck RoTec will show you how to successfully meet current challenges and secure significant competitive advantages through optimized balancing processes. Now especially, it pays to collaborate with a partner who focuses on efficiency, sustainability, innovation, and digitalization. That's why we invest significant amounts in research and development year after year.

Latest example of our innovative capabilities: the new generation of universal balancing machines for rotors in the weight range up to 700 kg – applicable to a variety of technical applications, such as electric armatures, fans and compressors, rollers, turbochargers, etc. We are looking forward to this world premiere in Hannover. Additionally, we will be presenting other highlights from our extensive product portfolio.

Come along and talk to us and your industry colleagues, while enjoying delicious finger food and beverages.

Please secure your free admission ticket today at

and schedule a personal meeting right away!

P.S.: Feel free to share this link with your colleagues. We look forward to your visit!

Precisely measure and interpret signals

Hotspot for infinite possibilities

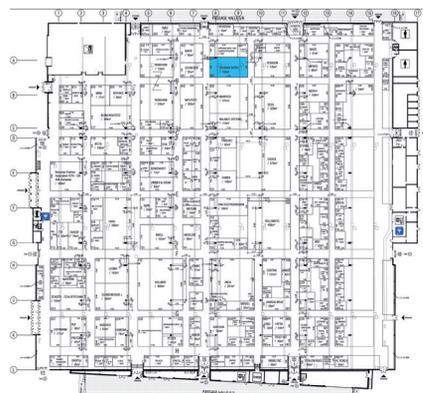

For efficiency and teamwork, let us work with you:
Schenck RoTec are currently the only company to offer software solutions throughout the entire balancing process.

Helping you increase efficiency, whilst minimizing the susceptibility to errors during balancing.

With Schenck ONE, you benefit from the latest software on the machine and in the cloud, accessible from any device.
